

*Protect staff with the industry's most diverse portfolio of location-based safety devices*

CenTrak's Staff Duress and Panic Alerting products rely on active-UHF (RFID) location technology to enable immediate response times with location details during emergencies. To instantly locate the specific individual under duress, alerts are initiated by a simple button-press, pull-cord, pendant pull or fall detection – depending upon the form factor chosen that best fits the facility's needs. CenTrak provides staff members with peace of mind knowing that they are always protected.

## How it Works:

Each staff member is provided with a CenTrak device, featuring wireless call functionality, that delivers the real-time location of individuals subject to work-related injuries or attacks. In the event a staff member needs assistance or is faced with a threatening situation, the individual can discreetly summon help. With CenTrak's Location and Security Services platform, the solution instantly informs the appropriate responders as to the identity of the staff member and the precise sub-room location of the emergency. The solution also integrates with traditional security systems, video management systems, access control, and mass notification systems, as well as a variety of other third-party and healthcare technologies, such as Nurse Call Systems.

## Why CenTrak's Staff Duress & Panic Alerting Solution?

- Multiple form factors: wearables, wall and desk surface mounting capable devices, etc.
- Various alarm activation options and alert notification methods
- Indoor/outdoor capabilities to provide exact location of incident
- International safety compliance including IC, FCC, CE
- LED status indicator with field replaceable lithium battery
- Mobile App for Alarm annunciation and acknowledgment
- Simple to use, easy to clean
- Logs all incidents
- Advanced system supervision
- System reliability & scalability
- Customizable buttons
- Server Redundancy when required

## Why CenTrak?

CenTrak's Second Generation Infrared (Gen2IR™) delivers certainty-based location data at the room-, bed-, bay- and chair-level. Our Enterprise Location Services provide rapid location updates, extreme battery life and fully waterproof tags while integrating with hundreds of healthcare applications.

No other Location Services platform provides this level of performance and interoperability, making CenTrak the ideal technology to support healthcare staff safety and security needs.

CenTrak's Security Solutions suite uniquely combines the industry's most accurate Real-Time Location System (RTLS) with a proven safety/security system. The platform is fully integrated with easy-to-use, advanced and highly reliable software packages. Management and maintenance of this solution is simple and intuitive, yet highly sophisticated, with advanced settings making it attractive and approachable for all types of users.

## What makes CenTrak Smarter?

**Clinical-Grade Locating™** - CenTrak's Second Generation Infrared (Gen2IR™) delivers certainty-based location data covering rooms, beds, bays, nursing stations, hallway segments and other relevant workflow areas. Rapid location and condition updates reliably capture interactions between equipment, patients and staff within seconds.

**Multiple form factors** - Largest selection of tags including reusable, single use, infant, wander, and staff badges provide options for all types of patients and care environments.

**Multi-Mode Technology** - A unique combination of Wi-Fi, CenTrak's Gen2IR, Low Frequency RF, UHF Active RFID, Bluetooth Low Energy (BLE), and others to future-proof investment and maximize ROI.

**Easy Installation** - Battery-powered devices are installed easily in patient care areas without the need to close rooms or deploy special infection prevention measures.

**Interoperability** - Open location platform for seamless integration with both existing and new applications including Nurse Call, Electronic Health Records, Capacity Management, Bed Management, Asset Management, Computerized Maintenance Management and Hand Hygiene Compliance.

**Reliability** - Ensures critical location, condition and status updates are delivered to the application level. Enterprise-class monitoring provides at-a-glance visibility. Devices and tags are equipped with long-lasting batteries.
